Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           US-09-543-407-5

Yeast 10:S69-S74(1994).

YEAST 10:S69-S74(1994).

YEAST 10:SESENTIAL COMPONENT OF NUCLEAR PORE COMPLEX.

YEAST OF NUCLEOPORINS MAY BE INVOLVED IN BOTH BINDING AND TRANS

THE PROTEINS DURING NUCLEOCYTOPLASMIC TRANSPORT.

YES SUBCELLULAR LOCATION: NUCLEAR PORE COMPLEX.

YES DOMAIN: CONTAINS G-L-F-G REPEATS.

YES SIMILARITY: BELONGS TO THE GLFG FAMILY OF NUCLEOPORING.
                                                                                                                                                                                                                                                  MEDLINE-93054906; PubMed-1385442; Wente S.R., Rout M.P., Blobel G.; Wente New family of yeast nuclear pore J. "The ovo gene of Drosophila encodes a zinc finger protein required for female germ line development.";

EMBO J. 10:2259-2266(1991).

1- FUNCTION: REQUIRED FOR SURVIVAL AND DIFFERENTIATION OF FEMALE GERM LINE CELLS. PLAYS A ROLE IN GERM LINE SEX DETERMINATION.

-1- SUBCELLULAR LOCATION: Nuclear (Potential).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Garfinkel M.D., Wang J., Liang Y., Mahowald A.P.; "Multiple products from the shavenbaby-ovo gene region melanogaster: relationship to genetic complexity."; Mol. Outer membrane protein B precursor (168 kDa surface-layer protein)
(Surface protein antigen) (Cell surface antigen 5) (Sca5) (rompB)
(romp B) [Contains: 120 kDa surface-exposed protein (Surface protein antigen) (120 kDa outer membrane protein ompB); 32 kDa beta peptide).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             OMPB_RICJA STANDARD; PRT; 16
